

Mohd Rusly Tamsir

Rusly currently holds the position of Chief Operating Officer at Lumut Port, bringing extensive expertise in port management, maritime safety, and a range of construction sectors, including civil and marine engineering, as well as the oil & gas industry. His distinguished tenure as a Deck Officer in the Royal Malaysian Navy further enhances his robust background.

With a thorough education in Maritime Studies and Industrial Safety backed with his 30 years of professional experience, Rusly excels in managing complex port operations, ensuring compliance with essential standards, and leading intricate port infrastructure projects. His responsibilities include implementing advanced safety protocols, optimizing operational processes, enhancing port resource functionality, and driving business growth.

Rusly is also skilled at building and maintaining strong relationships with stakeholders, regulatory agencies, and industry partners, ensuring smooth and compliant port operations.
